BROCOCK
THE PROFESSIONALS' CHOICE

OUR HERITAGE

Founded in Birmingham's historic gun quarter in the UK, BRK-Brocock has stood at the forefront of the global air rifle market.

Now, more than 30 years later, BRK-Brocock produces some of the finest pre-charged pneumatic (PCP) rifles in the world from a purpose-built facility in Staffordshire, UK which we share with sister company Daystate.

We've always had an eye on the future and were an early adopter of advanced CNC machining. We're also the only company to use Huma-Air regulators across our entire range. And in 2020 we also introduced sidelever cocking as standard, repositioning our rifles as the XR series.

As a result of these and many other innovations, we are transitioning our corporate identity from Brocock to BRK, a name we feel more accurately portrays our spirit of creativity, innovation and quality.

MODERN TIMES

Our engineers and gunsmiths are driven to deliver dependable and reliable PCP air rifles that are capable of the highest levels of performance. However, we know our customers demand more so we design our rifles to be modular, enabling shooters to customize their set up with an array of options and configurations such as folding stocks, interchangeable air bottles/cylinders and many other accessories.

At their heart though, each BRK-Brocock rifle is designed to deliver every time and never let you down.

USED BY CHAMPIONS

BRK-Brocock rifles have been the choice of professional pest controllers for decades thanks to their combination of rugged build quality, reliable performance and unerring accuracy. Perhaps it's no surprise that top hunters and competition target shooters, who appreciate these qualities too, have also turned to our rifles.

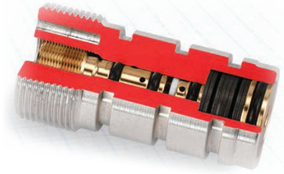
HUMA AIR REGULATOR

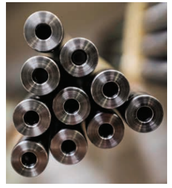
In recent years, many air rifle manufacturers have recognized the benefits of fitting their rifles with a regulator, a small high-pressure device that controls the volume and pressure of air used for each shot.

But there are regulators, and then there are regulators. The role they perform is vital to ensure consistent power delivery and accuracy and to make the most of every drop of air in your rifle's bottle or cylinder.

Simply put, Dutch company Huma-Air makes the best regulators in the world and almost every BRK-Brocock and Daystate rifle, has one. Each regulator is designed in partnership with Huma-Air to complement our latest hammer designs to precisely meter air release to eliminate inaccuracy related to a power curve and ensure minimal shot-to-shot deviation as the rifle cycles through its usable air charge. In addition to superior accuracy, the use of Huma-Air regulators achieves more efficient use of air to return more shots per fill up.



THE A.R.T. BARREL



The Accuracy Research Team (A.R.T.) is a collaboration between world renowned barrel specialists and a worldwide group of expert shooters from a range of disciplines. Their combined expertise has resulted in the creation of air rifle barrels that far exceed the accuracy potential of anything seen up until now. The Accuracy Research Team (A.R.T.) developed barrels fitted exclusively to BRK-Brocock and Daystate rifles deliver accuracy and performance that other companies simply struggle to match.

SELF INDEXING MAGAZINE

Our high-capacity magazines are made from the finest alloy materials to deliver many thousands of shots reliably and accurately. The self-indexing design is easy to load and ensures perfect pellet/slug to bore alignment. And each magazine inserts into the breech from the right to accommodate scopes with oversize parallax adjustment wheels.

.177 13 shots
.22 11 shots
.25 10 shots
.30 8 shots

BRK GHOST

The BRK Ghost is a showcase for how good a mechanical PCP air rifle can be.

Latest PCP design technology built around a revolutionary monocoque chassis reduces the number of potential leak points and maximizes rigidity, eliminates stress points and improves accuracy.

Designed to satisfy a multitude of air rifle needs, the BRK Ghost features a quick and easy interchangeable barrel systems so you can choose between four different calibres in a matter of minutes.

Available in a choice of barrel lengths from 17 to 23 inches, and 300cc or 480cc air bottles, the Carbine, Plus and High Power BRK Ghost range addresses just about every air rifle requirement. And thanks to a 20-point power dial at the back of the action, further fingertip refinement is possible to cover different environments and optimize performance for different ammunition.

Additionally, higher-power models feature a finger-adjustable dial to fine-tune the BRK Ghost's regulator pressure, handily shown on a separate gauge. Yet more versatility is built in with a user-swappable side lever from left to right, an adjustable cheek and butt pad and left or right-side magazine feed, making the BRK Ghost truly ambidextrous.

Supplied with a hard case, the BRK Ghost has many more desirable features: a fully-adjustable, match-style trigger, fully-shrouded barrel with a ½ in UNF thread for an additional silencer, cross-bolt manual safety, adjustable Picatinny scope rail to enable perfect eye to scope relief, and three additional accessory rails. BRK-Brocock's official custom supplier, Precision Rifle Systems (PRS) provides a full range of accessories including butt pads, extended forend rail and a cheekpiece riser which allows two magazines to be loaded back-to-back to double the BRK Ghost's shot count.

Note: Above image shown with optional extras

FEATURES

- Compact 'monocoque' alloy chassis
- Micro-adjustable power setting wheel
- New Alpha valve technology
- Modular platform
- User tunable Huma-Air Air regulator

MAIN SPECIFICATIONS

- **Overall Length**
  Carbine 18ins (455mm)
  Plus 29ins (731mm)
  HP 33.6ins (855mm)
- **Barrel Length**
  Carbine and Plus 17ins (432mm)
  HP 23ins (600mm)
- **Weight**
  Carbine 6.83lbs (31kg)
  Plus 7.05lbs (3.2kg)
  HP 7.5lbs (3.4kg)
- **Available Calibres**
  .177/4.5mm .22/5.5mm,
  .25/6.36mm .30/7.62mm
- **Power**
  .177 (4.5mm) up to 31ftlbs (42J)
  .22 (5.5mm) up to 65ftlbs (88J)
  .25 (6.35mm) up to 70ftlbs (95J)
  .30 (7.62mm) up to 95ftlbs (129J)

PATHFINDER XR

The super-light and compact Ranger XR has quickly become a firm favourite with hunters and pest controllers.

Building on its success and reputation, the new Pathfinder XR features a lightweight 300CC carbon Kevlar bottle for increased shot count compared to the Ranger XR. Export and FAC models also benefit from higher power output as well.

The Pathfinder XR measures a carbine length 616mm with its folding stock deployed, and just 416mm with it retracted, resulting in a rifle that is incredibly fast onto the target and useful in tight situations. It weighs just 2.9kg (6.4lbs), and yet in the 12ft/lbs model can deliver over 200 shots. Export .22 calibre models produce energy up to 25ft/lbs. Super compact and able to be easily transported in a backpack, or optional purpose-built rifle slip. The Pathfinder XR offers superb accuracy at hunting ranges out to 40 meters and beyond and its slick sidelever action enables fast reloading. The Pathfinder features an advanced Huma-Air regulator and newly introduced hammer design. This new system is our most consistent yet which results in superb performance and accuracy.

FEATURES

- Ambidextrous stock with folding, telescopic stock
- Huma-Air regulated
- Ergonomic sidelever operation
- New, removable self-indexing 13-shot (.177), 11-shot (.22) or 10-shot (.25) rotary magazine with flip-open loading gate
- Single-shot tray
- Three power settings via side power adjuster
- Picatinny dovetail rail for precise scope mounting.
- Lower Picatinny accessory rails for bipod, torch etc.
- Two-stage adjustable trigger
- Resettable safety catch
- Adaptor for optional 0dB moderator

MAIN SPECIFICATIONS

- **Overall Length**
  18.5ins to 25.5ins
  (416mm-616mm)
- **Barrel Length**
  10.1ins (256mm)
- **Weight**
  6.4lbs (2.9kg)
- **Available Calibres**
  .177/4.5mm .22/5.5mm
  .25/6.35mm
- **Power**
  12-25ft/lbs (16-34J)

XR / SNIPER XR / SAHARA XR

BRK-Brocock's innovative semi-bullpup design results in vastly improved gun handling and rifle 'pointability'.

The XR series rank among the shortest air rifles on the market, with the Sahara and Mini versions measuring just 820mm from its adjustable butt to its shrouded muzzle.

An on-the-fly power adjuster, self-indexing magazine, match grade barrel with integral shroud and adjustable trigger completes the super compact package of this unique and handy air rifle.

Sniper and Sahara versions are fitted with a Huma-Air regulator while the black only XR is unregulated for shooters who prefer a simpler design and lower cost alternative.

Sniper XR versions can be suppled in a grey laminated wood. All versions feature cheek-piece and butt pad adjustment for a perfect gun fit.

RANGEMASTER KAISER · RANGEMASTER SOVEREIGN · RANGEMASTER SOVEREIGN HUNTER · RANGEMASTER KING · RANGEMASTER EMPEROR · RANGEMASTER JUGGERNAUT

FEATURES

- Ergonomic sidelever operation
- Huma-Air regulator (Sniper XR)
- Multiple power settings via side power adjuster
- Removable 10 shot (.25), 11 shot (.22), 13 shot (.177) self-indexing magazine
- Polymer or laminate ambidextrous stock
- Adjustable cheek piece and butt pad
- Picatinny top rail included
- Underside Picatinny rail (optional on XR)
- Two stage trigger
- Resettable safety catch
- 432mm match quality barrel
- Full length, built in silencer with adaptor for 0dB moderator

MAIN SPECIFICATIONS

- **Overall Length** 34ins (863mm)
- **Sahara/Mini Version Length** 32ins (820mm)
- **Barrel Length** 17ins (432mm)
- **Weight** 7.3lbs (3.3kg)
- **Available Calibres** .177/4.5mm, .22/5.5mm, .25/6.36mm
- **Power** 12-50ft/lbs (16-68J)

SNIPER XR / SAFARI XR / SAHARA XR MAGNUM

BRK's innovative semi-bullpup has a popular XR Magnum version with a longer barrel that increases power by 20%.

The Magnum uses a special fast flow Huma-Air regulator. With a longer 56cm A.R.T. barrel, the rifle can deliver up to 46ft/lbs of energy in a .22 configuration and 55ft/lbs in .25.

The usual 'power curve' that unregulated PCPs suffer from on high powered air rifles has been eradicated through measured air control to ensure minimal shot-to-shot deviation as the rifle cycles through its usable air charge. This not only improves downrange accuracy but returns a shot count that reflects the huge hunting capabilities of this rifle.

An on-the-fly power adjuster, removable self-indexing magazine, integral shroud and adjustable trigger completes the package.

Sniper XR Magnum

Sahara XR Magnum

Safari XR Magnum

FEATURES

- Ergonomic sidelever operation
- Multiple power settings via side power adjuster
- Removable 10 shot (.25), 11 shot (.22) self-indexing magazine
- Polymer ambidextrous stock
- Safari-textured wooden hand-finished ambidextrous stock
- Adjustable cheek piece and butt pad
- Underside Picatinny rail
- Picatinny top rail
- Two stage trigger
- Resettable safety catch
- 600mm A.R.T. barrel
- Full length, built in silencer with ½ inch UNF thread for 0dB moderator
- Huma-Air regulator

MAIN SPECIFICATIONS
